

LADY VEST

1. Breathable unisex thoracic Vest made of 100% cotton.
2. Heeds the anatomy of female thorax and avoids the discomfort caused by compression.
3. Applies a real, dynamic and constant compression on the thorax not interfered by the cushioning effect of the breasts.
4. Protects the thorax against the expansion forces produced by coughing or by inappropriate chest movements.
5. Provides a direct and cushioned compression on the surgical wound, reducing the inflammatory exudate and accelerating the healing process.
6. Relieves chest mechanical pain.
7. Prevents wire breaks and sternal dehiscence.
8. Minimises risk of surgical wound infections and mediastinitis.
9. Prevents readmissions and sternal reoperations.
10. Reduces hospital stay and medical costs.

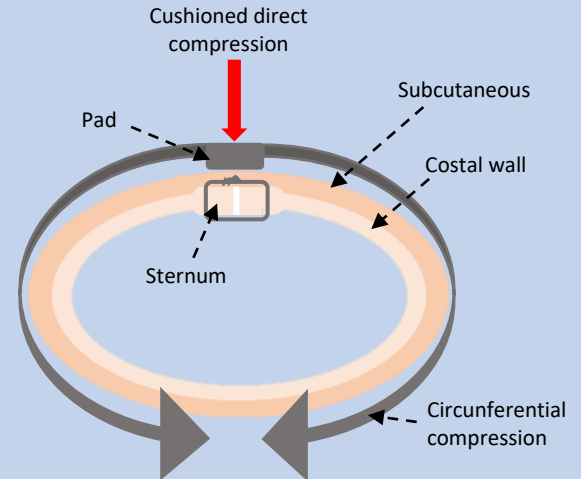

First Thoracic Vest

Designed heeding the functional and physical characteristics of female thorax
